- Play Video Button  
- Automatically opens and plays movie or show episode selected in fullscreen mode.
- New Items Page  
- Opens up New Items page, showing all the recent movies or show episodes uploaded.

## Side Menu

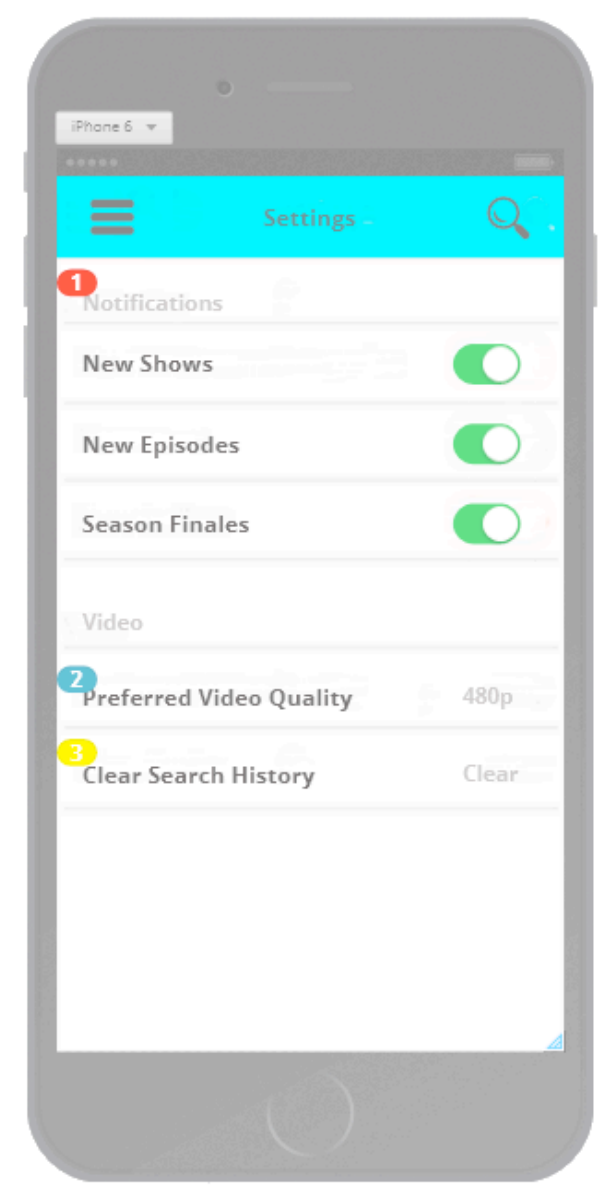

- Side Menu  
- Touching Side Menu Button slides screen to right, revealing buttons pointing to browsing Categories, browsing History Page, Settings Page, About Page, etc.

## Show Page

- Share, Favorite and Information Buttons  
- Share button opens up share screen with option to share movie or show episode via Twitter, Email, Facebook, Text Message, etc.  
  
- Favorite button marks movie or show as favorite thereby including it on the users Favorites Page, which can be accessed via the Side Menu.  
  
- Information button opens popup with a detailed description of the movie or show.
- See More Button  
- Loads 5 more recent episodes on page.

## Settings Page

- Notifications  
- Push Notifications for the application can be adjusted so that every time a new show, new episode from the users favorite shows or season finale is uploaded the application automatically notifies the user.
- Video Quality  
- Video quality can be adjusted from 480p to 1080p to HD, so that in case the video is being watched on a bigger screen the video quality best matches the screen size.
- Clear Search History  
- Clears users search history and erases all movies and shows from History Page
